PROFESSIONAL SUMMARY

Senior Data Scientist with more than 10 years of experience delivering advanced analytics and machine learning solutions in real-world environments.

Strong background in predictive modeling, statistical analysis, signal processing, and AI-driven decision systems. Experienced in working directly with multidisciplinary stakeholders to transform complex datasets into actionable business and operational insights.

PhD in Health and Wellbeing Technologies with extensive experience leading end-to-end analytical workflows, combining technical expertise with problem-solving and client-oriented communication.

CORE SKILLS

Data Science & Machine Learning

- Supervised and unsupervised machine learning
- Predictive modeling and classification
- Statistical analysis and experimental design
- Feature engineering and model validation

Programming & Tools

- Python, R
- TensorFlow/Keras, PyTorch
- Docker and reproducible pipelines
- Data processing and analytical workflows

Advanced Analytics

- Time-series analysis
- Signal processing
- Anomaly detection
- Data-driven decision support

Consulting & Stakeholder Management

- Client-facing project experience
- Cross-functional collaboration
- Communication of technical findings to non-technical audiences
- Strategic and analytical problem solving

PROFESSIONAL EXPERIENCE

Instituto de Biomecánica de Valencia (IBV)

Senior Data Scientist / Research Technologist

2016 – 2026

- Led development of data-driven analytical solutions for healthcare and industrial applications

- Designed predictive and classification models using multimodal datasets
- Applied statistical methodologies and machine learning techniques to support operational and strategic decision-making
- Developed end-to-end analytical pipelines including data acquisition, preprocessing, feature engineering, validation, and reporting
- Collaborated directly with clients, multidisciplinary teams, and stakeholders across research and innovation projects
- Participated in national and European R&D programs including H2020, CDTI-CERVERA, IVACE, and AVI
- Presented technical results and analytical insights to both technical and non-technical audiences

SELECTED PROJECT EXPERIENCE

- Predictive analytics systems for mobility and risk assessment
- AI-driven decision support systems using multimodal data
- Statistical validation and analytical optimization of real-world systems
- Development of scalable analytical methodologies for healthcare and industrial environments

EDUCATION

- PhD in Health and Wellbeing Technologies (Cum Laude)
Universitat Politècnica de València
- MSc in Electronic Systems Engineering
Universitat Politècnica de València
- BSc in Industrial Engineering – Industrial Electronics
Universitat Politècnica de València

LANGUAGES

- Spanish – Native
- English – Professional working proficiency

KEYWORDS

Senior Data Scientist, Machine Learning, Predictive Analytics, Supervised Learning, Unsupervised Learning, AI, Statistical Modeling, Stakeholder Management, Client-Facing, MLOps, Python, Data Science, Decision Systems, Advanced Analytics
